

iContext

The AI Agent for Private Capital Intelligence

1. Executive Summary

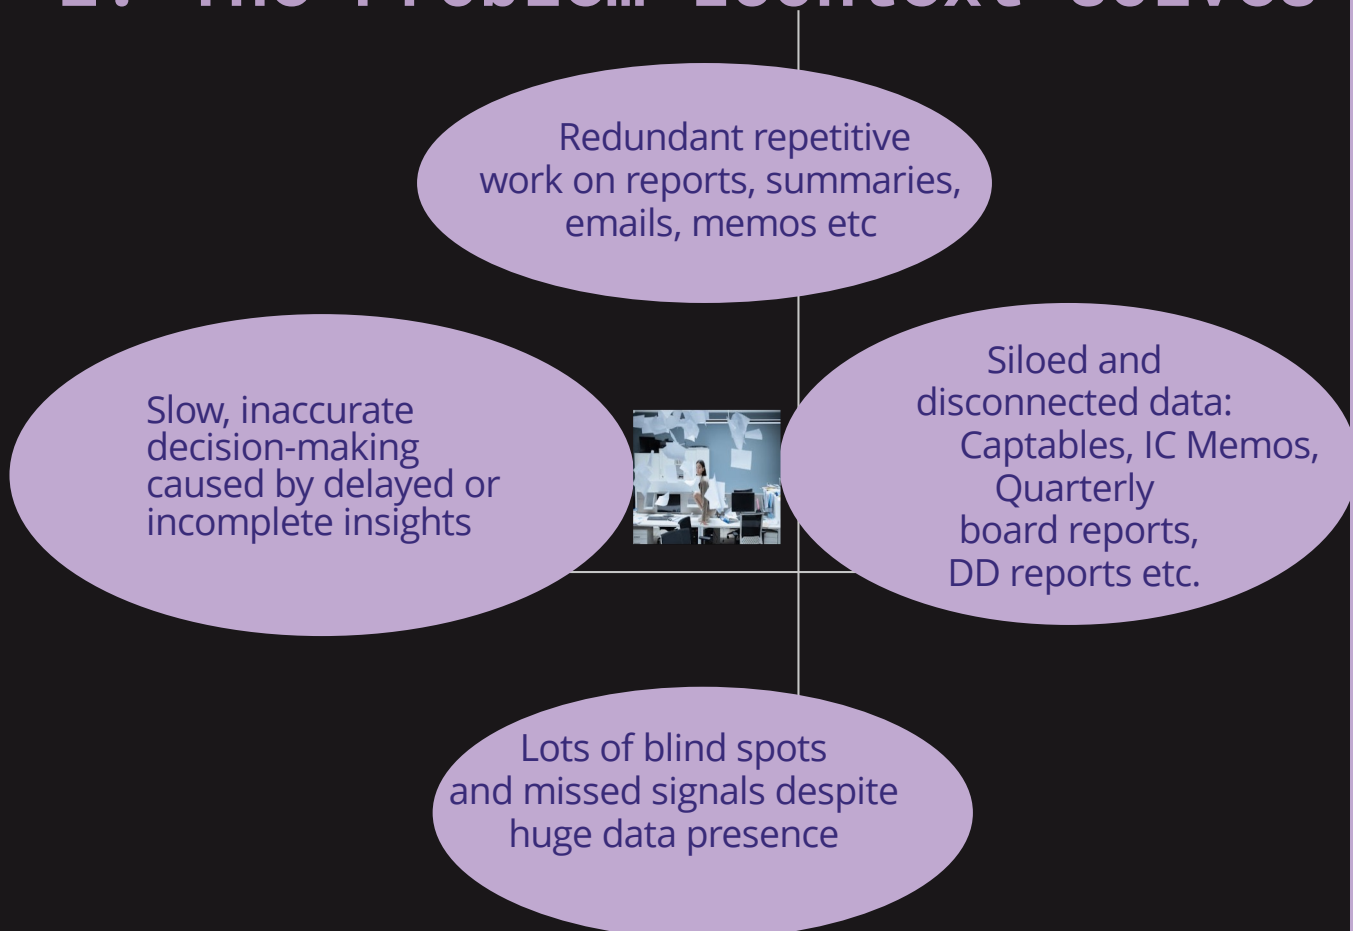

iContext is an AI Agent that gives private capital firms instant access to the insights and intelligence buried across their documents, systems, and workflows.

By securely and privately connecting AI to document repositories (IC memos, due diligence reports, cap tables) and enterprise databases (ERPs, CRMs, HRIS, trackers), it transforms fragmented data into unified intelligence.

Its daily dashboard surfaces key insights, missed actions, and emerging risks — enabling faster, smarter decisions that improve with every use

2. The Problem iContext solves

3. The Solution

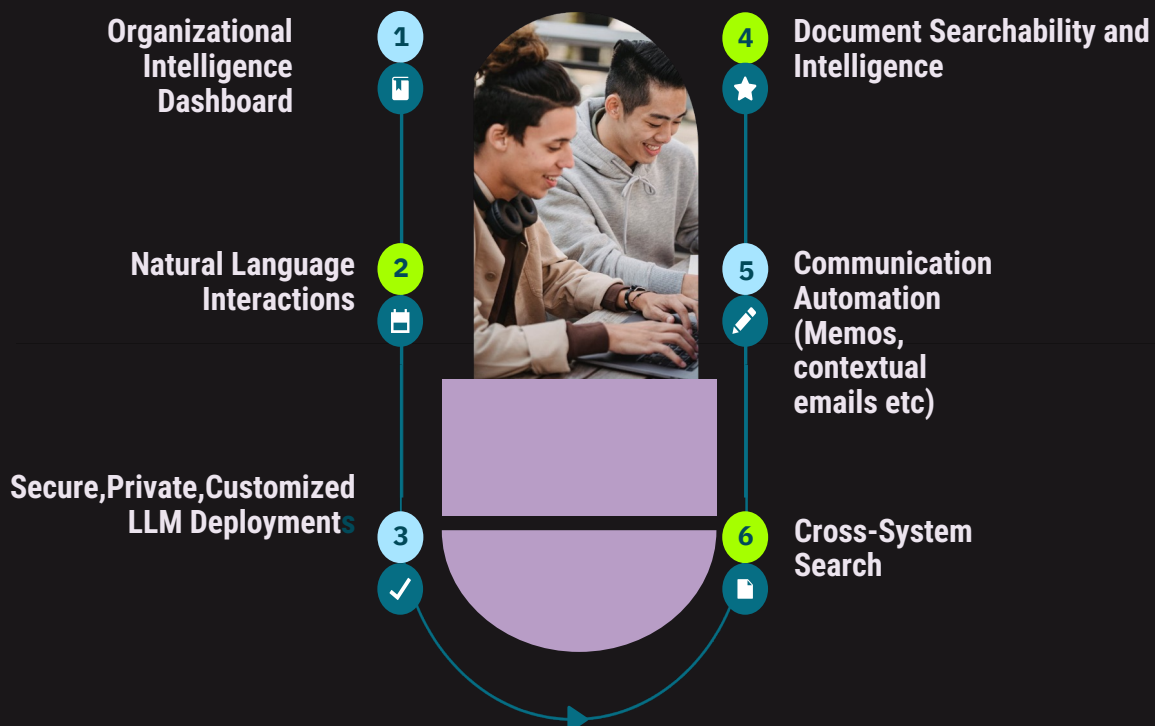

iContext connects to your documents, trackers, emails, CRMs, systems, workflows, and then uses AI to deliver insights, draft communications, and crystalize intelligence across teams.

iContext also actively learns from every interaction, fine-tunes itself to your workflows, and highlights risks and opportunities - even before you ask.

iContext is your firm's intelligence, on autopilot through AI

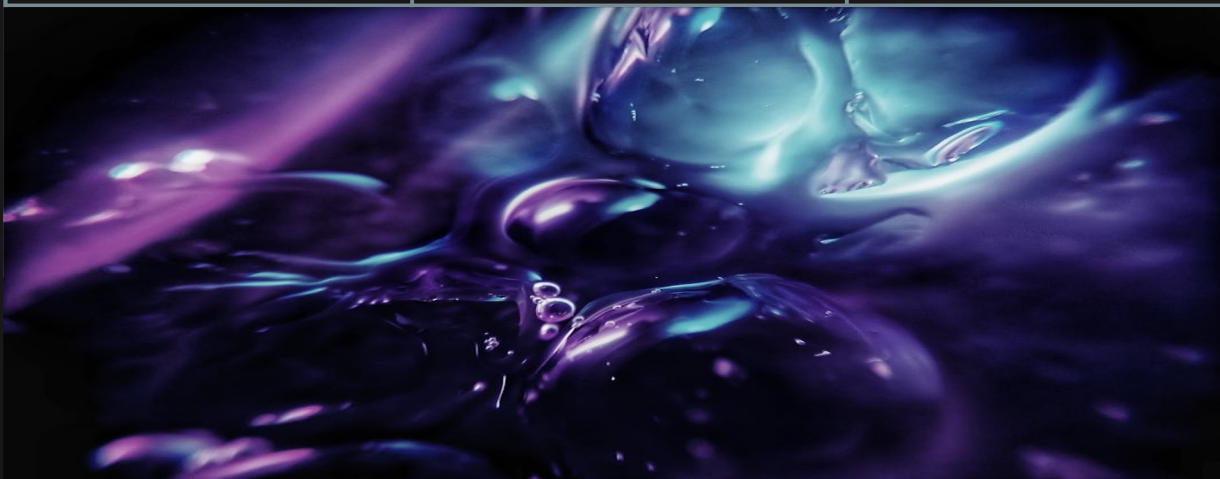

4. Key Features

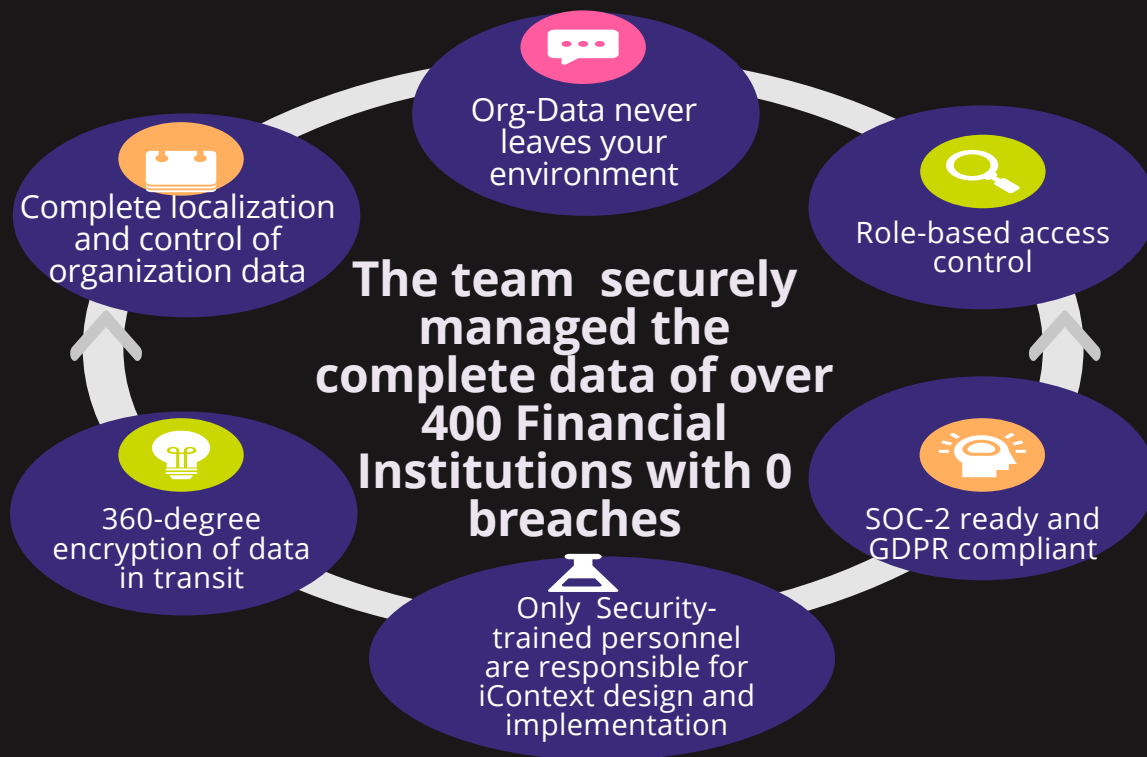

5. Benefits: Measurable Impact & Key KPIs

KPI	What Improves	Estimated Uplift
Deal Turnaround Time	Reduction in Time spent in movement from sourcing to IC decisions	↓ 30-40%
Analyst & Associate Productivity	Increased output per team member (reports, memos, analysis)	↑ 50-70%
Executive Response Velocity	Increase in number approvals and strategy decisions	↑ 25-35%

6. Security and Data Privacy
